- b15273 1889-1914 Icones Ornithopterorum. A monograph of the Papilioninae tribe Troides of Hübner or Ornithoptera (Bird-wing butterflies) of Boisduval. London, Author Folio 1:[iii]+86 pp. tfs, 45 cpl & pl & maps; 2:104 pp, frontispiece, 83 cfs & tfs, 59 cpl & maps. The two volumes were issued in parts from 1889 to 1907. It appears that individual copies of parts were distributed as the author's painting of the plates proceeded. Thus no precise date of issue for parts can be determined. Several of the earlier pages and plates were also reissued at later dates in a revised or corrected capacity. Plates VII and 10 in vol. I were both published uncoloured. However, one, or possibly two copies, of plate VII were specially coloured for their owners by the author after they had received them. As far as can be ascertained, only 33 copies of this work were ever completed. (Moulds, 1977). [1889-1914]

All species dealt with were in the family Nymphalidae. Kocak considers Petrus Ericus Becklin as author of this, but this is incorrect. Becklin was a respondent (pupil) under Thunberg. He had to defend a thesis written by Thunberg. The situation parallels that of Johansson and Linnaeus. For additional notes, see Karsholt and Nielsen. [Ref: b4019; b10338; b10739] [1784-1795]

PART II
INDEX TO JOURNALS AND SERIALS

INTRODUCTION

This section is straightforward and needs little introduction. Abbreviations used in journal titles have been taken from the *World List of Scientific Periodicals* [b19866]. Papers with multiple authors are listed under the senior author only, and it has been found necessary to occasionally truncate the authors name to keep the listings orderly. When this has been done it is indicated by using a '*' at the end of the name. For convenience a few publications which were issued in parts with various authors have been treated as if they were journals (i.e. Annot. Lep., In Romanoff, Mém. Lép. and In Seitz, Grossschmett. Erde.).

Allg. Lit.-Zeit.

Allgemeine Literatur-Zeitung. [Jena (1785-1803), Halle & Leipzig (1804-1849).] [A publication in which experts in different subjects reviewed current published works. Zoologists occasionally introduced new names where they thought they were needed. Thus no titles as such were used; the full title, price and publisher, etc. would appear at the head of the article. Reviews were often anonymous; (e.g. "R.L.", or "***"). A daily, with 4 volumes per year, and more than 300 numbers.]
